

# FLAG BANNER ASSEMBLY INSTRUCTIONS

**CONTENTS:** 2 DIFFERENT SIZE RIGID POLES  
2 DIFFERENT SIZE FLEXIBLE POLES

1 LAWN SPIKE  
1 FLAG CLIP AND BUNGEE

1 BLACK NYLON STORAGE CASE  
(FLAG NOT INCLUDED WITH POLE & SPIKE KIT)

## STEP 1:

Insert the lawn spike into the ground.

**NOTE:** Keep the spike as vertical as possible for the best display of the banner. Use a rubber mallet or a hammer to assist in driving the spike into the ground, be careful not to strike the swivel post. Striking the swivel post may damage the bearing not allowing the flag to swivel with the wind or striking it may dent the post and not allow the flag pole to properly slide onto the swivel post.

## STEP 2:

Attach the two flexible poles by inserting the larger hollow metal collar over the smaller solid metal collar

## STEP 3:

Slide the flag over the first two flexible poles leaving the end of the pole exposed to attach to the rigid poles

## STEP 4:

Attach the two rigid poles together in the same manner as the flexible poles

## STEP 5:

Attach the rigid poles to the flexible poles by inserting the flexible poles into the rigid pole's collar.

## STEP 6:

Slide the flag all the way down the rigid poles.

## STEP 7:

Attach the bungee and clip to the grommets at bottom of the flag banner's pole pocket.

## STEP 8:

Pull the flag down the rest of the way till you are able to attach the bungee clip onto the flange  
**NOTE:** The top two flexible poles will bend, giving the flag banner its shape

Slide the largest diameter rigid pole onto the ground spike's swivel post

**NOTE:** Due to temperature and manufacturing variances the pole will slide onto the post somewhere between 50 & 100%. 50% is more than enough as long as the pole is snug it will not come off during use. DO NOT force the pole on as this will cause it to be very difficult to separate the pieces later.
